## 2020-2021 Inclement Weather Procedures

*The Learning Will Continue...*

During the 2020-2021 school year, we will physically close our buildings for inclement weather, but learning will continue in the remote setting as an asynchronous day for students. Work will be provided for students in grades K-12 on any inclement weather days. This will ensure our ability to keep our students safe during inclement weather while allowing our students to continue learning.

This also allows the District to meet the NYSED requirement for student attendance without needing to add additional calendar days to the end of the school year.

Students and families will receive additional information from their building principal and/or teachers for asynchronous learning on inclement weather days.
