

Wednesday

Amber needs \$20 to buy a new game. She has already saved \$5. If she earns \$5 every week she mows the lawn, how many more weeks does she need to work to meet her goal?

Circle all shapes that contain at least one right angle:

Compare using $<$, $>$, or $=$.

$$\frac{3}{8} \quad \underline{\quad} \quad \frac{4}{8}$$

Solve: $82 \div 9 = \underline{\quad}$
