

Thursday

Solve:

$$20 \times 100 = \underline{\quad}$$

$$300 \times 10 = \underline{\quad}$$

$$5 \times 10 = \underline{\quad}$$

Is this a line of symmetry?

1 foot = 12 inches, therefore:

$$2 \text{ feet} = \underline{\quad} \text{ inches}$$

$$4 \text{ feet} = \underline{\quad} \text{ inches}$$

Fill in the blanks to complete the equation:

$$\frac{3}{8} = \frac{\boxed{\quad}}{\boxed{\quad}} + \frac{\boxed{\quad}}{\boxed{\quad}} + \frac{\boxed{\quad}}{\boxed{\quad}}$$
